

GrouNZ Flat Top® Screw

A Screw With a Large Plate To Attach Everything

When placing and attaching a structure, this screw provides multiple options for fixings and a large surface to position it accurately. It is compatible with all adapters and common 3rd party fixings. Perfectly suited to support lightweight structures like cabins, containers and movable homes, it is also versatile enough for smaller installations like ground mounted solar panels or carports. Fitted with the bearer, L or post adapters it can be used for decks, fences and other timber frame structures.

GrouNZ Flat Top	1500	2000	2500
Length (mm)	1500	2000	2500
Shaft Diameter (mm)	76	76	76
Shaft Thickness (mm)	4	4	4
